Registered office	Rua nº 12, casa s/nº, Bairro Rocha Triângulo, Distrito Urbano da Samba, Luanda, Angola (near BIC)
Platform	Salacope Online (https://salacope.online), a product of the company
Market	Republic of the Congo (Congo-Brazzaville)
Policy owner	Compliance Officer (MLRO), appointed by management
Approved by	Lídia Clemência Luemba Chivango, Managing Partner (Gerente)
Version / date	1.0 – 30 September 2026
Review	At least annually, or after any material change to the business or the law

1. Introduction

1.1 Policy statement

Salacope Online (“Salacope”) is an online platform owned by Lídia & Mariana – Comércio Geral e Prestação de Serviços, Lda. Its name joins the Lingala word “salacope”, doing a personal job to get paid, and “online”: a place where Congolese freelancers do work and get paid on the internet.

On Salacope, independent sellers offer digital services (including AI-generated images and videos on request, design and online coaching) and digital products (e-books, templates, online courses) to buyers in the Republic of the Congo. Buyers pay in CFA francs (XAF) by MTN Mobile Money or Airtel Money through our approved payment partner.

Salacope is committed to preventing its platform from being used for money laundering (ML), terrorist financing (TF), proliferation financing, fraud or any other financial crime. We apply a risk-based approach

(RBA): we identify, assess and understand the risks our business is exposed to, and apply controls proportionate to those risks.

1.2 Objectives

- Know who our sellers are before they can sell or receive any funds.
- Make sure every payment matches a real sale of a permitted digital product or service.
- Detect, investigate and report unusual or suspicious activity, and stop it.
- Keep complete records that allow any transaction to be reconstructed.
- Cooperate fully with our payment partners, regulators and Financial Intelligence Units.

Salacope has **zero tolerance** for any breach of this Policy. Any incident must be reported immediately to the Compliance Officer.

1.3 Legal and regulatory context

This Policy is based on the following texts, and any later amendment to them applies automatically:

- FATF 40 Recommendations and related guidance;
- Angola: Law No. 5/20 of 27 January 2020 on the prevention and fight against money laundering, terrorist financing and proliferation (country of incorporation);
- Republic of the Congo: CEMAC Regulation No. 01/16/CEMAC/UMAC/CM of 11 April 2016 on the prevention and repression of money laundering, terrorist financing and proliferation in Central Africa (country of operation);
- United Nations Security Council sanctions resolutions and consolidated list;
- Personal data protection laws of each country (Angola Law No. 22/11; Republic of the Congo Law No. 29-2019).

The competent Financial Intelligence Units are the ANIF (Agence Nationale d'Investigation Financière) in the Republic of the Congo, and the UIF (Unidade de Informação Financeira) in Angola.

2. Scope

This Policy applies to all activities of Salacope, to its managers, employees, contractors and service providers, and to every user of the platform: sellers, buyers (with or without an account) and any person acting on their behalf. It covers onboarding, payments, escrow, refunds, payouts and account closure.

3. How the platform works (risk context)

- **Products.** Only digital products and digital services are allowed: e-books, templates, online courses, coaching and creative services, including AI-generated images and videos made on request. Physical goods are not sold.
- **Payments in.** Buyers pay only by MTN Mobile Money or Airtel Money through our approved payment partner. Every mobile money account is already identified by its operator. Salacope never accepts cash, bank cards, cryptocurrencies or transfers outside the platform.
- **Escrow.** Each payment is held and is not available to the seller until the buyer validates the delivery. If the buyer neither validates nor disputes within 7 days of delivery, the funds are released. A dispute freezes the funds until a decision is taken.

- **Commission.** Salacope automatically deducts a commission from each validated sale, at the rate shown to the seller at the time of the sale. The rate may be modified according to the conditions of our third-party providers or our internal policy; sellers are informed of any change and, by accepting our terms and continuing to sell, agree to it. This commission is Salacope's only revenue from sales.
- **Payouts.** Released funds are credited to the seller's wallet. The seller can only withdraw them to a mobile money account registered in the seller's own verified name.
- **Refunds.** A refund is always sent back to the mobile money number that made the payment, never to a third party.
- **No off-platform contact.** Buyers and sellers communicate only through the Salacope chat. The system blocks the exchange of phone numbers, e-mail addresses and other contact details, which prevents deals and payments from being moved off the platform.

4. Roles and responsibilities

4.1 Management (Managing Partner)

- Is ultimately accountable for this Policy and approves it at least annually;
- Appoints the Compliance Officer and gives them enough resources and independence;
- Approves high-risk relationships (including PEPs) and decides on escalated cases.

4.2 Compliance Officer (MLRO)

- Owns this Policy and the risk assessment, and keeps them up to date;
- Reviews and decides on seller KYC files, alerts and investigations;
- Files Suspicious Transaction Reports (STR) with the competent FIU and answers requests from authorities and payment partners;
- Reports to management at least quarterly (see section 10);
- Organises training and keeps the records required by section 11.

4.3 Staff and contractors

- Report any unusual activity to the Compliance Officer without delay;
- Never tell a user that a report has been made or that they are being investigated (no "tipping off");
- Complete AML/CFT training at onboarding and every year.

5. Risk-based approach

5.1 Risk assessment

The Compliance Officer carries out a documented ML/TF risk assessment at least once a year, and before launching any new product, payment method or country. It covers:

- **Customer risk:** sellers (identity, activity, PEP or sanctions exposure) and buyers (guest or registered);
- **Product risk:** services with a subjective value (e.g. custom services, coaching) are higher risk than fixed-price digital files;
- **Channel and payment risk:** fully online, mobile money only, escrow before release;
- **Geographic risk:** countries of operation and nationality or residence of users.

5.2 Risk appetite and prohibited activities

Salacope has no appetite for any activity that could be used to move or store value. The following are prohibited on the platform (non-exhaustive list):

- gaming vouchers, gift cards, prepaid cards, top-ups, e-money or any other stored-value product (removed from the platform);
- cryptocurrencies, trading signals, investment, lending, pyramid or “get rich quick” schemes;
- gambling, betting and lotteries;
- pirated or counterfeit content, resale of content without the rights to it;
- forged or fake documents, hacking, account resale, stolen data;
- AI images or videos that impersonate a real person without consent, or that are sexual, violent or defamatory;
- adult and escort services, drugs, pharmaceuticals, weapons;
- any product or service offered by or for sanctioned persons, shell companies or persons whose identity cannot be verified.

Listings are reviewed against this list. A listing that breaches it is removed and the seller’s account is reviewed.

6. Seller onboarding and KYC

No one can publish a listing or receive funds before their identity has been verified and approved by the Compliance Officer.

6.1 Standard due diligence (individual sellers)

Information collected	How it is verified
Full name, date of birth, nationality, residential address	Compared with the identity document
National identity card or passport (both sides), valid	Visual check of authenticity, validity and consistency
Selfie holding the identity document	Face and document match the applicant
Mobile money number for payouts	Must be registered in the seller’s own name (name returned by the operator where available)
Description of the activity and of the products or services offered	Consistent with the listings and allowed by section 5.2
PEP self-declaration	Checked by screening (section 6.4)

6.2 Business sellers

In addition to the above: company name, registration number (RCCM or equivalent), tax number, registered address, registration documents, and the identity documents of the directors and of every beneficial owner holding 25% or more.

6.3 Buyers

Buyers may pay without creating an account. Each payment is made from a mobile money account identified by its operator, and the buyer's phone number is kept with the transaction. Buyers' activity is covered by transaction monitoring (section 7), and a buyer may be asked to identify themselves if an alert is raised.

6.4 Sanctions and PEP screening

Every seller, and every director and beneficial owner of a business seller, is screened at onboarding and again whenever the lists change. Screening covers at least the UN Security Council consolidated list, the US OFAC SDN list, the EU consolidated list and national lists. A confirmed match leads to refusal or immediate closure and, where required, a report to the FIU. Politically exposed persons (PEPs), their family members and close associates are rated high risk and can only be onboarded with enhanced due diligence and management approval.

6.5 Customer risk rating and reviews

Rating	Typical profile	KYC review
Low	Individual seller of fixed-price digital files, low volume	Every 3 years
Medium	Service sellers; business sellers; volume near monitoring thresholds	Every 2 years
High	PEPs, adverse media, repeated alerts or disputes, unusual volume	Every year and enhanced monitoring

A review is also triggered by a change of activity, an STR, an established fraud, negative media, a request from an authority, or a payment partner.

6.6 Enhanced due diligence (EDD)

For high-risk sellers, Salacope may ask for proof of address, the source of funds or of income, and evidence of the work delivered (portfolio, samples, contracts). EDD files are approved by management. Where due diligence cannot be completed, the account is refused or closed and the Compliance Officer considers an STR.

7. Transaction monitoring

Every payment, escrow release, refund, dispute and payout is recorded in the platform ledger and linked to an order, a listing, a buyer phone number and a verified seller. The system generates alerts, which the Compliance Officer reviews within 2 business days.

7.1 Alert rules (initial thresholds)

Scenario	Initial threshold
Sales received by one seller	> 1,000,000 XAF in 7 days or > 3,000,000 XAF in 30 days
Same buyer number paying the same seller repeatedly	> 5 payments in 24 hours

Single order of unusually high value	> 300,000 XAF, or far above the seller's usual price
Buyer and seller linked (same phone number, payout number, device or identity)	Any occurrence
One payout number or identity used by several seller accounts	Any occurrence
Service validated almost immediately after payment, repeatedly	3 or more in 7 days
High rate of refunds, disputes or failed payments	> 10% of a seller's orders in 30 days
Attempts to share contact details or move payment off the platform	Repeated attempts
Many payments with round or split amounts just under a threshold	Pattern observed

Thresholds are set by the Compliance Officer, adjusted to each seller's risk rating, reviewed at least once a year, and every change is documented with its reason. Volume limits set by our payment partner apply in addition.

7.2 Handling an alert

- **Review:** the Compliance Officer examines the orders, messages, delivery and history of the users involved.
- **Protect:** while the review is open, the related funds stay in escrow or are frozen, and payouts may be suspended.
- **Ask:** where needed, the user is asked for information or documents, without revealing any suspicion.
- **Decide:** close the alert with a written reason, restrict or close the account, and/or file an STR (section 8).

Every alert, its review and the decision are recorded, including alerts closed without suspicion.

8. Suspicious activity and fraud

8.1 Suspicious Transaction Reports (STR)

When Salacope knows, suspects or has reasonable grounds to suspect that funds come from a crime or are linked to terrorist financing, the Compliance Officer files an STR with the competent FIU (ANIF in the Republic of the Congo; UIF in Angola) without delay, and informs our payment partner where the law allows. Salacope does not execute or release a transaction it suspects before the report is made, where possible. Access to STRs is limited to the Compliance Officer and management. Tipping off is strictly forbidden.

8.2 Fraud on the platform

- **Buyer protection:** escrow means that a seller who does not deliver is never paid; the buyer is refunded to the number that paid.
- **Disputes:** the funds are frozen and the case is decided by Salacope on the basis of the order, the delivery and the chat history.
- **Account takeover and fake accounts:** payouts only to a mobile money account in the verified seller's name; any change of payout number requires a new check.

- **Sanctions:** listings removed, funds withheld as allowed by law, account closed, and identity documents and phone numbers added to an internal blocklist that is checked at every onboarding.

9. Training and awareness

Every manager, employee and contractor with access to users, listings or payments receives AML/CFT training at onboarding and at least once a year. It covers this Policy, prohibited activities, warning signs of money laundering, fraud and terrorist financing, how to escalate, and the prohibition of tipping off. Attendance is recorded.

10. Reporting to management

At least quarterly, the Compliance Officer reports to management on: sellers onboarded, refused and closed; alerts raised and closed; STRs filed; disputes and refunds; screening results; training; changes to thresholds; and any control weakness with its corrective action.

11. Record keeping

Salacope keeps, for at least **ten (10) years** after the end of the relationship or the date of the transaction (or longer if local law requires):

- KYC files: identity data, documents, screening results and risk ratings;
- transaction records: date, amount, currency, payer number, seller, order, listing, escrow status, refunds and payouts;
- alerts, investigations, decisions and STRs, with supporting documents;
- account closures and the reasons for them;
- risk assessments, reports to management and training records.

The platform ledger is double-entry and append-only: entries are never modified or deleted, which allows any transaction to be reconstructed. Records are made available to authorities and payment partners on request, as soon as possible.

12. Data protection

Personal data collected under this Policy is used only for identification, security and legal obligations. It is stored securely, access is limited to authorised staff, and it is processed in line with the personal data protection laws of each country. Buyers and sellers never see each other's phone number or e-mail address on the platform.

13. Independent review

The effectiveness of this Policy and of its controls is reviewed every year by a person independent from day-to-day operations (internal or external). Findings are reported to management and corrected within an agreed timeline.

14. Non-compliance

Any breach of this Policy by a manager, employee or contractor may lead to disciplinary action, up to dismissal or termination of the contract, without prejudice to civil or criminal penalties. No exception may be granted that would breach the law or the risk appetite in section 5.2.

15. Review and approval

This Policy is reviewed at least once a year and whenever the law, the products, the payment methods or the countries of operation change. Each version is approved by management and kept on record.

Approved by: Lúdia & Mariana – Comércio Geral e Prestação de Serviços, Lda, owner of Salacope Online, represented by its Managing Partner (Gerente), Lúdia Clemência Luemba Chivango.

Effective date: 30 September 2026. This Policy is published at <https://salacope.online/legal/lutte-anti-blanchiment>.

16. Governing law

This Policy is governed by the laws of the Republic of Angola. Any dispute or controversy relating to it is subject to the competent courts of Luanda.

Appendix A – Glossary

Term	Definition
AML/CFT	Anti-money laundering and countering the financing of terrorism.
Beneficial owner	Natural person who ultimately owns or controls a business seller (25% or more, or control by other means).
CDD / KYC	Customer due diligence / know your customer: identifying and verifying a user and understanding their activity.
EDD	Enhanced due diligence applied to high-risk users.
Escrow	Holding of a buyer's payment until the delivery is validated, the validation period ends or a dispute is decided.
FIU	Financial Intelligence Unit (ANIF in the Republic of the Congo, UIF in Angola).
MLRO	Money Laundering Reporting Officer; here, the Compliance Officer.
PEP	Politically exposed person, as defined by the FATF, including family members and close associates.
STR	Suspicious Transaction Report filed with the FIU.
Tipping off	Disclosing to a person that a report has been made or that they are being investigated.
